Technical Skills

Backend

Java · Spring Boot · Node.js · NestJS · .NET · WebFlux · RxJava · Flask · Django

Frontend

Next.js · React · Angular · Ionic · Tailwind CSS · Sass

Programming Languages

JavaScript · TypeScript · C# · Python · Kotlin

Databases

MySQL · PostgreSQL · MongoDB · Redis

Tools

RabbitMQ · Figma · Machine Learning · OpenAI API

Testing

JUnit · Mockito · Jest · Selenium · Postman · Karate

Cloud & DevOps

Azure · AWS · GCP · SQS · Docker · Kubernetes · Jenkins · Terraform · GitHub · New Relic · SonarQube

Languages

Professional English	Professional
Native Spanish	Native
Basic Portuguese	Basic

Career Profile

Sr Fullstack Developer with 6 years of experience, the last 3 years working remotely for US companies with technologies such as Next.js, NestJS, Java Spring Boot, Azure and DevOps. I have experience working in startups for different companies in sectors such as Retail, Fintech and SaaS Providers. I specialize in developing complex solutions, mainly for telemetries in the financial, retail automation, CI/CD and quality testing. Committed to continuous improvement and building efficient and scalable software.

Professional Experience

Data Scientist Expert / AI Tech Lead

Entel

2025-11 - Present
Hybrid

Entel is one of the largest telecommunications companies in Chile and Peru. As AI Tech Lead of SinfonIA, I lead the development of an AI-powered platform for transcribing hundreds of thousands of daily audio calls using Whisper X, silence detection, and generating insights to help agents improve performance and reduce operational costs by 75%.

- Leading the AI team as Tech Lead for SinfonIA, a voice-to-text transcription platform processing hundreds of thousands of audio files daily
- Implemented Whisper X for high-accuracy speech-to-text transcription with silence detection capabilities
- Developed AI-driven insights engine to analyze agent performance and provide actionable recommendations
- Achieved 75% cost reduction compared to previous vendor solution through in-house AI implementation
- Architected scalable serverless infrastructure using AWS Lambda and SQS for processing and queuing massive audio workloads

Python · FastAPI · Whisper X · AWS · Lambda · SQS · OpenAI · Next.js · React · Machine Learning · Speech-to-Text · NLP

Technical Lead

309 Technology - USA

2025-04 - 2025-11
Hybrid

309 Technology is a startup company based in the USA focused on innovative technology solutions and AI-driven applications.

- Leading the entire development team using agile methodologies such as Scrumban and Jira for project management
- Architecting and developing applications using Next.js, AI integration, Java, and Kotlin with Spring Boot
- Managing cloud infrastructure on AWS and implementing machine learning solutions
- Designing user interfaces and user experience with Figma while coordinating with cross-functional teams
- Establishing development standards and best practices for the engineering team

Next.js · AI · Java · Kotlin · Spring Boot · AWS · Machine Learning · Figma · Scrumban · Jira · React · TypeScript · Microservices

Sr Software Engineer

Encora (Clients: Interbank, Niubiz, Scotiabank) - Peru

2023-10 - 2025-04
Remote

- Microsoft Certified: Azure AI Engineer Associate
  Microsoft
  2025-04
- Scrum Fundamentals Certified (SFC)
  SCRUMstudy - Accreditation Body for Scrum and Agile
  2024-04
- Izipay AI Hackathon Winner
  Izipay
- BCP AI Hackathon Winner
  Banco de Crédito del Perú

Encora is a global technology company that provides innovative software engineering solutions to leading enterprises across various industries.

- As part of the team, I developed backend applications using Java Spring Boot, implementing reactive programming with WebFlux and RxJava, and ensuring high-performance financial services. I conducted unit testing with JUnit and Mockito, deployed services on Azure and AWS, and monitored applications with New Relic.
- Additionally, I contributed to frontend development with Angular and Next.js and applied DevOps practices using SonarQube, Kiuwan, and CheckStyle. At Scotiabank, I worked with Java 8 and Eclipse, focusing on secure and efficient financial solutions.

Java | Spring Boot | WebFlux | RxJava | DynamoDB | Redis | Keycloak | Azure | AWS | Kubernetes | New Relic | Angular | Next.js | SonarQube | Kiuwan | CheckStyle | Jira | JUnit | Mockito | Eclipse

Sr Software Engineer

Serverli - Florida USA

2024-06 - 2024-12
Remote

Serverli is a platform for managing and monitoring physical and IoT security systems, integrating video, access control and devices in real time. As a Senior Software Engineer, I led frontend development with Next.js and backend with Nest.js, managing environments in Azure, improving architectures and specializing in IoT security applications.

- Led frontend development with Next.js and backend development with Nest.js, focusing on IoT security applications
- Managed environments in Azure, improving system architectures and optimizing deployment processes
- Specialized in developing IoT security solutions integrating video surveillance, access control, and real-time device monitoring

JavaScript | TypeScript | Next.js | Figma | NestJS | .Net | C# | Python | Azure | Kubernetes

Software Engineer

MDP Consulting

2020-11 - 2023-10
Hybrid

MDP Consulting is a recognized leader in IT services, offering innovative solutions for clients in Latin America. During my time at the company, I progressed through multiple roles including Backend Technical Leader, AI Developer, Cloud Administrator & DevOps, Scrum Master & Mentor, and Senior Developer, working on diverse projects spanning backend development, AI integration, cloud infrastructure, and team leadership.

- Backend Technical Leader: Led Pacific Client project using Java Spring Boot with Java 11/17, implementing functional and reactive programming patterns
- AI Developer: Developed AI solutions for Reseñan Colombia Client using OpenAI APIs and machine learning technologies
- Cloud Administrator & DevOps: Managed infrastructure automation and deployment pipelines across AWS, Azure, and GCP platforms
- Scrum Master & Mentor: Led MDP bootcamp program, providing technical training and mentoring to junior developers
- Tech Lead: Managed full-stack development projects with Memorandum, a Greek technology company, overseeing both backend and frontend development
- Senior Developer: Delivered high-quality backend solutions with Java Spring Boot and Node.js, and frontend applications with Angular, Ionic, and React

Java | Spring Boot | Node.js | Angular | React | Ionic | Python | OpenAI | AWS | Azure | GCP | Docker | Kubernetes | Jenkins

Terraform | SonarQube | TDD | BDD

Recent Personal Projects

Monyx - Personal Finance App with AI

Next.js | React | TypeScript | AI/ML | OpenAI API | Computer Vision | Node.js | PostgreSQL | Tailwind CSS | Supabase

Developed a comprehensive personal finance application powered by AI that helps users categorize expenses, capture receipts through photo recognition, and receive intelligent financial recommendations for better money management.

- Implemented AI-powered expense categorization using machine learning algorithms
- Built OCR and computer vision system for automatic receipt scanning and data extraction
- Created intelligent financial advisor with personalized recommendations
- Developed real-time expense tracking and budget management features
- Achieved 95% accuracy in expense categorization and receipt recognition

Live Demo | Code

CV Builder for Developers

Next.js | React | TypeScript | Tailwind CSS | React Icons | PDF Generation | Local Storage | Responsive Design

Created a modern, responsive CV builder specifically designed for software developers, featuring multiple templates, real-time preview, PDF export, and integration with technology icons and professional layouts.

- Built dynamic CV generator with real-time preview and multiple professional templates
- Integrated comprehensive technology icon library for skills visualization
- Implemented PDF export functionality with professional formatting
- Created responsive design optimized for both desktop and mobile devices
- Developed intuitive drag-and-drop interface for easy customization

Education

B.S. in Software Engineering

Universidad Peruana de Ciencias Aplicadas

2020-03 - 2024-11
Lima, Peru

Bachelor's degree in Software Engineering

Focus: Software Engineering, Data Structures and Algorithms, Database Systems, Software Architecture, Computer Networks, Operating Systems

Advanced English (ICPNA)

Language Institute

2019-01 - 2020-12
Lima, Peru

Advanced English certification program
